INTERVIEW WITH THE HEADMISTRESS

Q. What are the main duties of a headmistress?

Ans. A headmistress acts as a link between the parents, students and teachers. She helps in creating a positive learning environment, oversees school operations, ensures academic excellence, manages staff and fosters a positive learning environment.

Q. Does the school help the students in career counselling after finishing school?

Ans. Definitely. Many experts visit our school to take sessions and brief students about their career journey. Teachers and our career counsellor also guides students in choosing the right subjects and career options. We also conduct an annual career fair to enable students to explore opportunities and openings. Universities and collages across the country visit our school for the fair to help our students gain knowledge about various career options available for them.

Q. What do you love the most about our school?

Ans. The holistic development that our school provides to the students, including academic excellence, assured fluent English communication skills, enhancement in leadership skills and values.

Q. How do you use technology in teaching?

Ans. The internet and computers are used to help students understand things better. We conduct robotics classes where students learn various innovative skills practically. We don't have books for computers and robotics, discouraging rote learning. We utilize smart boards in every classroom to enhance teaching quality and provide digital resources for interactive learning.

Q. How do students celebrate special days so well? Who comes up with the ideas of celebration?

Ans. Students celebrate special days through special assemblies, related activities, events, etc. Which are planned and executed by the teachers. These events promote cultural awareness and teamwork.

Q. If you could change one thing about the education system, what would it be?

Ans. I'd transform the education system by shifting the focus from formal examinations to practical, skill-based learning, providing customized support for students and emphasizing skill development over marks.

Q. Why are rules important for students?

Ans. Rules are important as they make students disciplined. We establish rules that promote a safe, respectful and productive learning environment.

Q. How do you deal with students who have difficulty in studies or other behavioural problems?

Ans. We provide them counselling and try our best to understand such students. We provide support and guidance to help them improve. We also offer individualized support and collaborate with parents to address academic and behavioural challenges. Additionally, we have a special educator to help the students improve their performance.

Q. How do you assess students' performance?

Ans. We assess students through class tests and term exams. We also judge their performances through various activities such as stage performances, competitions, etc. We use a range of assessments to monitor students' progress.

Q. Any memorable experience you want to share with us?

Ans. Every day is a new learning experience. When children give love and respect in their own ways, it makes me feel grateful and happy. Seeing students grow and succeed, whether academically or personally and knowing the school played a role in their development is truly memorable.

OUR KINDLE EXPERIENCE: FROM OVEN TO CONFIDENCE

Last year, under the Skill Development Programme – Kindle, our teacher taught us how to bake brownies. It was my very first attempt, and I was extremely excited. I learnt how to measure the ingredients, mix them properly, and bake the brownies until they were soft and fudgy. Afterwards, I tried baking at home several times. Slowly, I gained confidence and even experimented by adding small twists, such as choco chips on top, to make them more chocolaty.

This year, I was given a special chance to teach my juniors. They asked so many questions like, "Why is curd required?" "Can we use oil instead of butter?" and many more. I answered them all patiently, and they were thrilled when their brownies turned out well. Now, I feel like an expert. It was an amazing experience to go from learning something new to teaching it to others.

Manjiri Ubale
Grade IX A

Last week, I got an amazing opportunity to act as a student-teacher for our Class VIII Kindle Activity. The activity was about teaching how to bake a simple cake. I was a little nervous, but with the guidance of our teacher, I was able to plan everything and lead the activity with confidence. This experience made me feel proud and more self-assured. Being a student-teacher and explaining a real-life skill like baking helped me connect better with my classmates and made learning truly enjoyable.

Janhvi Singh Gahlot
Grade VII G

I was recently chosen as a volunteer for the Kindle Activity held in the month of July, where we learnt how to bake a cake. Our mentor, Ms. Shweta Paul, shared many insightful facts related to baking. I also contributed by sharing a few dos and don'ts from my own baking experiences. Together, we baked a marble cake, which turned out beautiful and quite delicious. I thoroughly enjoyed the experience and gained new knowledge from it. This lesson felt like another precious addition to my collection of skills.

Anika Jha
Grade VIII A

I used to watch my mother bake, and gradually, I became interested in it too. One day, I asked her to teach me, and that's how I baked my very first cake. At first, I was nervous, but after baking two or three times, I started getting better results. The cake came out soft and tasty, which made me very happy.

Later, during a Kindle Activity in school, I had the opportunity to share my baking experience with my classmates. I baked a cake in front of them and explained each step clearly so that they could try it themselves later. I also answered all their questions, which was great fun, because I was sharing something I truly love. This peer teaching and learning experience boosted my confidence tremendously.

CONNECTING CLASSROOMS TO CURRENTS: VISIT TO ADANI POWER PLANT

On **19th July 2025,** we visited the Adani Power Plant in Raipur, Chhattisgarh - a place where science, technology, and real-world challenges come together to illuminate millions of lives.

We had always been curious about the process behind the switch that lights up our homes. At Adani, we saw it all - live, large-scale, and loud. The plant, with an installed capacity of **1,370 MW,** is one of the largest coal-based thermal power stations in India and operates using **supercritical technology,** known for its higher efficiency and reduced emissions.

Upon arrival, we were warmly welcomed by the plant officials and given a safety briefing. Then came the most exciting part - the guided tour. We witnessed the complete power generation process: coal being transported, crushed, burned, and converted into high-pressure steam. This steam drives massive turbines and generators, following the **Rankine Cycle,** to ultimately produce electricity. It was like watching our science textbooks come to life - only more thrilling.

What impressed us most was the plant's dedication to sustainability. Advanced systems such as **Electrostatic Precipitators (ESP) and Flue Gas Desulphurisation (FGD)** help reduce air pollution and maintain cleaner emissions. Even though the plant handles over **six million tonnes of coal annually,** it ensures minimal environmental impact through strict monitoring and technology.

The Adani Power Plant is one of the India's leading private power producer, with four fully functional power-generating units at Raipur alone. These units are equipped with cutting-edge turbines and automation systems that supply electricity across states, powering homes, factories, and cities. The plant also actively contributes to community welfare through CSR initiatives such as education, healthcare, and village development.

In the central control room, we saw engineers monitoring every detail - from pressure and temperature to output levels - using real-time data and advanced software. A Q&A session with the engineers gave us insight into the challenges of running such a vast facility and opened our eyes to future careers in the power sector.

This visit wasn't just educational - it was transformational. It showed us how theory connects with real life and how much effort goes into something as simple as switching on a light. Such experiences are truly enlightening as they combine outdoor learning with practical exposure, leaving a lasting impact.

Khushi Shadija, Grade - XII A

GLOVES ON, SPIRIT HIGH: MY JOURNEY TO NATIONALS

I recently participated in the **CBSE Cluster Boxing Championship** held in Durgapur, West Bengal, where I had the privilege of representing my school. The six-day trip was an exhilarating experience, filled with intense competition, new friendships, and invaluable lessons. The tournament was hosted at Purv International School, and I was thrilled to interact with students from various schools.

Winning the silver medal was a highlight of the trip, and I owe my success to the unwavering support of my coach, Shubham Sir, and my parents. Their guidance, encouragement, and trust in me were instrumental in helping me push my limits and achieve this feat.

To make weight, I had to shed 8 kgs in just a month for the 60–63 kg category. I drastically changed my diet, cutting out sugar, fast food, and processed foods. The strict regimen was tough, but it paid off. This achievement has earned me a spot at the nationals, and I'm now working tirelessly to perfect my skills and bring home the gold.

The experience not only honed my boxing skills but also taught me the importance of perseverance, teamwork, and mental toughness. Interacting with fellow athletes from different schools broadened my perspective, and I appreciate the opportunity to learn from their experiences. I'm grateful to my school for providing me with the platform to participate in this tournament. This experience has motivated me to work harder and strive for excellence in both academics and sports. I sincerely thank everyone who supported me during this journey!

Myra Sharma, Grade - VIII

LEARNING TO THINK LIKE AN INVESTOR

Winning the Virtual Trading Competition has been one of the most intense experiences of my school life. It tested my patience, strategy, and mindset. I am proud to share that I have been the winner in five of the last six months and still counting which proves that consistency matters more than luck.

Trading has taught me discipline and composure. Losses were frustrating, but they pushed me to analyse, adapt, and return stronger. I realised that success, whether in the markets or in life, comes from making smart decisions and not allowing emotions to take control.

Most importantly, I learnt why financial literacy is vital for the future. Whatever career we choose, money management remains a life skill. Understanding how to plan, take risks wisely, and think long term prepares us to be independent and confident.

To my juniors, I would simply say: do not treat such competitions lightly. They are not only about winning they are practice for real life.

Akshat Daryani, Grade - XII

DISCOVERING THE ENTREPRENEUR WITHIN

On the first day of my Higher Secondary Business Administration (HSBA) journey, I walked into class with curiosity and a touch of excitement. I had heard that this stream was different not just about memorising textbooks, but about stepping into the real world of business.

The initial weeks introduced us to new concepts such as Business Administration, Financial Market Management, and Entrepreneurship. Instead of stopping at definitions, our teachers brought these topics to life. Every discussion was supported by examples from actual companies, and every assignment encouraged us to think like entrepreneurs, not just students.

Then came our first real-world exposure an industrial visit. We boarded the bus early in the morning and soon found ourselves inside a bustling company. Machines roared, employees moved with purpose, and managers spoke to us about supply chains, branding, and customer service. It felt like stepping into the pages of our textbooks - only louder, faster, and far more exciting.

Our second major experience was working on a live project. We were divided into teams and tasked with creating a small business plan, complete with budgeting, marketing strategies, and sales pitches. As we collaborated, debated, and fine-tuned our ideas, we realised this was exactly what entrepreneurs go through. Presenting our work to industry professionals was nerve-racking, but their feedback made us sharper and more confident.

Another unforgettable moment was attending a guest lecture by a young start-up founder. Hearing about their struggles, failures, and eventual success showed us that the business world is not just about theories - it is about resilience, adaptability, and constant learning. That session left us inspired, with many of us secretly thinking, “Maybe I can do this too.”

We came to realise that HSBA is not just a subject; it is training for the future. It encourages us to question how things work, to find better solutions, and to imagine building something of our own. Every project, case study, and educational tour became a step towards understanding how the business world operates beyond the classroom.

The HSBA experience gives us more than knowledge; it gives us the confidence to think, create, and lead. It teaches us that the real classroom is out there - in offices, factories, and markets - and that one day, we could be the ones running them.

Samiksha Chandra,
Grade XII C

WITNESSING DEMOCRACY IN ACTION – A DAY AT THE VIDHAN SABHA

The following report briefly describes the exhilarating field trip From Classroom to Assembly: Our Vidhan Sabha Experience. I, along with 19 of my batchmates, attended the second day of the Monsoon session in the CG Vidhan Sabha on 18th July.

The idea of the visit itself excited us, and the short journey to our destination kept us on our toes. As soon as we reached, we had to wait a little to get the passes for entry. Those few minutes helped us get acquainted with the environment of the place.

Soon, we were escorted inside the Vidhan Sabha after multiple security checks. At last, we had to wait in a room for our turn to sit inside the glass-covered balcony. While sitting and waiting, we had the chance to hear the insights of an employee working in the Vidhan Sabha.

Finally, the most awaited moment arrived — we entered the balcony-cum-room from where we could witness the proceedings of the Assembly.

There, being able to watch in person the people we usually only see on our screens, debating among each other in real life, was nothing less than surreal. It enhanced my understanding of the subject, as this part of it truly came to life for me that day.

I thoroughly enjoyed watching them debate and gained a much deeper understanding of how each of their words affects our individual lives in one way or another.

As the members of the Assembly started leaving and the session paused for a break, we left our seats and proceeded outside. While exiting, I noticed the beautiful and exquisite aesthetic of the place and was mesmerised, as it wasn't something I had expected.

We concluded our journey by clicking some pictures and then headed towards our bus.

Overall, the experience was impeccable. The only thing I would wish to change is to add a little more time, but still, it was my pleasure to be able to be a part of such an experience.

A special thanks to our teacher, Ms Vasundhara Ma'am, for making this possible and bringing our wish to life.

Yashika Jhambia
Grade XI-E
(Humanities)

FROM STUDENTS TO A LEADERS (STUDENT COUNCIL)

"Not just a Badge, but a Chance to Grow and Lead"

It feels surreal to wear this badge I once admired with stars in my eyes.

I joined this school in 2013. Back then, I was just a tiny curious child, unaware of the fact that school would become a second home to me. Over the past 12 years, the campus wasn't just about studies for me; it was a place to bloom and grow, to face fears and make memories, to discover my true identity – and become the version of myself I can be proud of.

Every year, I used to watch the Investiture Ceremony and admired those shiny badges given to my seniors. The applause, the pride of receiving the badge always fascinated me, and I always used to imagine myself as one of those students who were considered to be capable for the responsibilities. All those years of imagining couldn't prepare me for how deeply it would move me when it finally came true.

Parishitika Sahu
(Vice Prefect - Charlie House),
Grade XI B

I've had the chance to participate in a wide range of activities: from national-level competitions, where I was fortunate enough to win prizes, to inter-school and inter-house events that helped me step out of my comfort zone and explore my interests. I've also attended several workshops and interactive sessions, which taught me so many things beyond the regular textbooks.

Renee Yadav
(Prefect - Charlie House)
Grade XI A

I am studying at Brighton from nursery, now I am in grade XI. In class II, I started playing drum as a beginner than started playing in competitions and bagged many prizes. I was always interested in co -curricular activities held in school which made me the Cultural Secretary of the school. I was very nervous and happy too. I know my responsibilities to help assist the teachers in various events held at school. I'll do my best as an Incharge.

Ritesh Sahu
(Cultural Secretary)
Grade XI C

Becoming the Discipline Incharge of our school happened naturally, as I always believed in values like self-control, respect, and leading by example. For me, discipline is not just about following rules but about being consistent-coming on time, respecting others, and doing the right thing even when it's hard.
I'll keep doing my best to uphold it.

Ajaypal Singh (Discipline Incharge), Grade XI A

In this role, my aim is not to be strict, but to create a calm and fair environment. I try to be patient, listen to everyone, and make decisions that are just. I believe discipline works best when it comes from understanding, not fear. My responsibility is from handling tasks to dealing with different situations with maturity.

Anamika Rao (Discipline In charge), Grade XI A

I actively took part in different activities and always tried to give my best. My teachers saw my hard work and my English-speaking skills. When the Student Council was formed, I felt very happy and proud to be chosen as the student from Class 9. Later, I was selected as the Intonation Head, which gave me the chance to lead creative projects and share new ideas. I am eager to proceed with this journey; I am confident that I'll perform my duties well.

Avani Dewangan (Intonation Head), Grade IX D

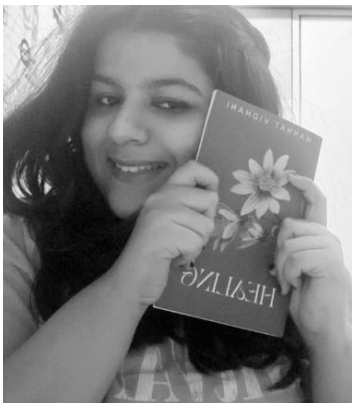

From last year, I've been involved in organizing events in school where I got the role of managing the teams, make decisions and ensure efficiency of work. The experience I had throughout my session made me develop leadership and communication skills, which prepared me for this role. My motivation came from Desire that I want some differentiation in school i.e I wanted to be a voice of my peers and ensure that their concern and suggestions were heard to everyone.

I feel a deep sense of pride and responsibility. I am committed to fulfil the roles to the best of my ability, ensuring that I represent student body with integrity. It is an honour for me to be chosen as a head boy.

Amanpreet Singh (Head Boy), Grade XII

WHERE DREAMS FOUND WORDS

It all started four years ago, when I was 14, and it was announced in class that a few students had to submit poems for the school magazine 'Rays'. Upset that I wasn't asked to contribute, I was determined to have something of my own to submit. I spent an hour lost in the world of words, asking my friends for their inputs and opinions, writing and rewriting my very first poem, The Passing Night. That experience was magical – crafting verses and finding meaning within them gave me a sense of confidence and belonging I hadn't felt before. That day, I discovered my true passion.

Within a few months, I had self-published two books on Notion Press, and a year later, I released a full-length version, The Labyrinth, on Amazon with the help of a publisher, Writer's Pocket.

None of this would have been possible without the support of my community. I owe a special debt of gratitude to my teachers – Meghla Ma'am, Jayesh Sir, and Reena Ma'am – who have keenly read my work from the start and supported me with their wonderful feedback. My family and friends have been my biggest cheerleaders, and I am also thankful to my school magazine,Rays, and its editors for giving a young writer a platform to begin a journey from a dreamer to an author.

Mannat Vidhani, Grade XII C

INDEPENDENCE DAY

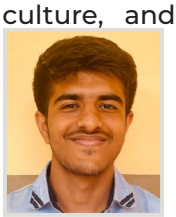

The 79th Independence Day, was celebrated the event with great enthusiasm and patriotic spirit. The programme began with the Flag Hoisting followed by the National Anthem, which filled everyone's heart with pride.

Inspiring speeches in English and Hindi highlighted the significance of freedom and the sacrifices made by our great leaders. Students showcased their talents through various performances – a soulful solo song by Yashvi Tyagi, melodious group songs by seniors and juniors, and a lively medley by seniors.

The cultural depth of our country was beautifully portrayed through a Hindi poem and vibrant dance performances. The band presentation "The silence before war and the cry when it begins" left the audience spellbound, followed by mesmerizing dance forms like Kathak-Bharatanatyam fusion, 'Yatra Tatra Sarvatra' depicting the valour of the three-armed forces, and a powerful dance drama on Sambhaji Maharaj.

The programme concluded with a heartfelt Vote of Thanks delivered by Amanpreet Singh, Head Boy, expressing gratitude to all who contributed to the success of the event.

Overall, the day was a perfect blend of patriotism, culture, and creativity, making it a memorable celebration for everyone.

Chirag Tahilyani
(Sports Secretary),
Grade XII B

I was eagerly waiting for the Independence Day celebration. The practice for the programme began just after my pre-midterm exam.We celebrate independence week at Brighton on 12, 13 & 14 August during which my school organised various competitions and events as usual, such as patriotic poems, nukkad-natak, group discussions, role-plays, elocution, and more.

On 15th August, the respected Chairman sir unfurled the national flag in the presence of the Principal, Vice-Principal, Headmistress, and Vice-Chairman. The march past was a spectacular display of the discipline, coordination, and unity of Brightonites.

My friends and I were very excited for the day. We came to school in civil dress, as we rarely get the chance to wear anything other than our school uniform. We all looked lovely in white kurtas with tricolour dupattas.

The first programme was a solo song presented by the primary students, filled with love and praise for our country. This was followed by a classical patriotic song sung by the seniors, after which the school band delivered an energetic performance with perfect coordination of the bass drum, flute, congo, djembe, and more, leaving the audience mesmerised. The primary students then presented a group song, a melodious medley of patriotic tunes overflowing with emotion.

There were three dance performances that showed the pride and valour of all three Armed Forces of India. Indeed, it was a proud moment. My seniors did a classical dance, which was a fusion of Kathak and Bharatnatyam on the songs 'Araj -Garaj'; watching them was a treat to the eyes. It was a perfect example of 'unity in diversity'.

Then came the performance that left everyone shocked, emotional, and flooded with patriotism. It was a skit and dance on "Sambhaji Maharaj", the great warrior of the Maratha Empire and India. The audience saw how he fought against a tyrant king, Aurangzeb; his death in the skit left me emotional.

I know we will celebrate many Independence Days, but this was memorable.

I enjoyed watching the spectacular display, and this Independence Day truly felt special. This year, parents of participants were also invited to witness the enthusiasm, patriotism, and magic that we created on 15th August with the support of our teachers.

We received much applause and appreciation from the audience. This celebration gives us an opportunity to remember and pay tribute to our great freedom fighters. We should never forget the immense sacrifices made by these remarkable people, which won freedom for our country.

Yashvi Tyagi
Grade IV A

INDEPENDENCE WEEK CELEBRATION

The month of August was very special for me, as I got the chance to take part in three competitions on three days in a row. Each event was different, but all of them gave me confidence, creativity, and wonderful memories.

On 12th August, our school held a poem recitation competition for Classes IV and V. One by one, the participants recited patriotic poems, and it was lovely to listen to everyone.

The next day, 13th August, we had the inter-class skit competition. Our section performed a play on child labour. It showed the story of Ravi, a poor boy working at a tea stall, whose life changed when some students and a teacher encouraged his family to send him to school. They also told them about schemes like the Mid-Day Meal which could support his studies. At the end, Ravi said, "I could have never imagined myself holding a pen in my hand and going to school." His words touched everyone's heart and showed the true power of education.

On the third day, we had a Poster Making Competition on the theme Cultural Heritage and Festivals. I made a poster showing different festivals of India. It was fun to use colours and imagination to show our culture and unity.

These three days were very inspiring and enjoyable. They made me feel more confident, creative, and proud of expressing myself.
